

Peak One Administration LLC

Security Practices

We take the security of your data very seriously at Peak One Administration. As transparency is one of the principles on which our company is built, we aim to be as clear and open as we can about the way we handle security. If you have additional questions regarding security, we are happy to answer them. Please write to security@peakoneadmin.com and we will respond as quickly as we can.

This Security Practices Page describes the administrative, technical and physical controls applicable to Peak One.

Data Security

Peak One encrypts data at rest and in transit.

Audits

To verify that our security practices are sound and to monitor for new vulnerabilities discovered by the security research community, Peak One undergoes security assessments by internal personnel and external security firms who perform regular audits.

Security Controls

Peak One will implement and maintain appropriate technical and organizational measures to protect your data against accidental or unlawful destruction, loss, alteration, and unauthorized disclosure of or access to Customer's personal data processed or transmitted by Peak One. Peak One has a number of security controls, including, but not limited to:

- Access logging
- Access management
- Data retention
- Network protection
- Multi-factor authentication
